3 REASON'S WHY REALLOCATING IS SO IMPORTANT

Oftentimes we consult with offices who don't feel the need to reallocate insurance balances. Rather, they feel more comfortable leaving the entire insurance balance 'due now' and deducting from that balance as insurance payments come in.

1

Your insurance AR report will always remain inaccurate and you'll never be able to see what is truly past due.

2

This method makes it nearly impossible to know which claims need immediate attention, leaving the practice susceptible to non-payment per timely filing clauses.

3

Your financial coordinator will be stuck dealing with 3x the amount of work as he/she is now having to review EVERY account each month as opposed to the ones who need immediate attention.
